The Beginning of Sila Holding in the Healthcare Sector

Sila Holding started providing services in the healthcare sector in 1997 and quickly expanded its business volume significantly.

Contributing to the development of the private healthcare sector in Turkey, the Holding has undertaken hospital projects in many countries by adopting a policy of delivering high-quality, reliable, and cost-effective healthcare services to communities around the world.

Comprehensive Service Network and Areas of Expertise

The companies within Sila Holding provide services in the following areas with deep industry knowledge, experience, and innovative approaches:

- Healthcare
- Construction and Architecture
- Consultancy
- Occupational Health and Safety
- Information Technology
- Formation
- Real Estate

Projects That Make a Difference in Turkey and Around the World

Sila Holding makes a difference not only in Turkey but also through its projects around the world.

It is one of the largest investors in hospital projects carried out under the groundbreaking Public-Private Partnership (PPP) model in the Turkish healthcare sector.

Through the consortium it has established, the Holding is responsible for the construction and operation of hospitals with a total capacity of 10,000 beds.

A Global Journey Toward the Future

At Sila Holding, we continue our exciting journey in healthcare and technology across many countries with the support of our thousands of employees.

With our strong infrastructure, experienced team, and global vision, we are committed to delivering sustainable solutions in healthcare.

Dr. İhsan ŞAHİN
Chairman of the Board, Sila Holding

As Sila Holding, with our physical therapy and rehabilitation centers operating in various regions of Turkey, we aim to improve individuals' quality of life.

At our centers, expert doctors and experienced therapists provide diagnostic services, physical therapy applications, and specialized treatment methods supported by advanced technology.

All our centers are accredited and certified in accordance with international health standards. With our modern equipment, we prioritize patient safety and effective treatment in delivering our services.

Ankara Mamak Center

Our physical therapy center located in the Mamak district offers comprehensive treatment services tailored to the needs of individuals living in this area of Ankara.

With its expert staff and technological infrastructure, high-quality and reliable physical therapy treatments are provided.

Ankara Subayevleri Center

Our physical therapy and rehabilitation center located in Ankara Subayevleri serves the local community with expert doctors and therapists.

Supported by advanced technology, our center carefully conducts diagnostic services and physical therapy treatments.

Kozaklı Physical Therapy Hospital | Nevşehir

This hospital, located in Kozaklı district of Nevşehir, was reopened after 25 years with the contributions of Sila Group.

With a capacity of 200 beds, Kozaklı Physical Therapy Hospital is one of Turkey's largest and most important thermal physical therapy and rehabilitation centers.

The hospital is equipped with robotic walking devices, hydrotherapy applications, and advanced physical therapy equipment. The entire physical therapy team (including physicians) and the equipment infrastructure belong entirely to Sila Group.
